

## TEDMED at Georgia State University

TEDMED is where the world's most creative minds meet health care's most innovative science. Speakers include global leaders from science, research, technology, academia, business, government and the arts.

### 8:15-10 a.m. **TEDMED Session 9: Hiding in Plain Sight**

- **Steve Gullans**, managing director, Excel Venture Management: *When is "safe dosing" a dangerous prescription?*
- **Mariano Vazquez**, researcher, Barcelona Computing Center: *How do I compute the Body Electric?*
- **Laura Deming**, partner, The Longevity Fund: *How do we make prevention a \$1 trillion business?*
- **Elizabeth Marincola**, publisher, Science News; president, Society for Science and the Public: *With open access, who translates medical research?*
- **Isaac Kohane**, professor, Harvard Medical School: *How can every clinical visit be used to advance medical science?*

### 11 a.m.-12:30 p.m. **TEDMED Session 10: Coming Together**

- **Richard Payne**, medical and divinity professor, Duke University: *How does it end?*
- **Erin Barker**, senior producer, The Story Collider: *What is the best medicine?*
- **Ben Lillie**, co-founder and director, The Story Collider: *What is the best medicine?*
- **Raghava KK**, multidisciplinary contemporary artist: *What happens now . . . that I can read your brainwaves?*
- **Eli Beer**, founder and president, United Hatzalah: *How did volunteers save more than 40,000 lives in 3 minutes (each) last year?*
- **Victor Wang**, founder and CEO, GeriJoy Inc.: *How can helping you help me?*
