

Hands on Workshop on Robotics/ IoT

CS Club invites you to Learn about Raspberry Pi, how to use it, and how to built awesome robotics and IoT projects with it!
Instructor: **Md Modasshir** from **Autonomous Field Robotics Laboratory, USC.**

Bio: Primary research interest of Modasshir is *Deep Learning in Robotic Vision*. Currently, he is working towards solutions to find out visual cues for robot localization and mapping for underwater autonomous vehicle using deep learning models. His work focuses on *fusing AI with traditional Robotics* for efficient adaptation of autonomous Robots in diverse terrains.

**March 8, Friday, Room 755, 7th floor,
25 Park Place, From 2:30 pm till 5:00 pm
Please RSVP using the QR code bellow.**

**Group of participants will have access to
Raspberry Pi to gain hands on experience!**

Plus, Door Prize & Free FOOD!
