

Coke Rewards Code Citizen Science Project

Recruiting motivated students interested in the following areas

- Computer science
- Cryptography
- Data science
- Data mining
- Data journalism
- Mathematics
- Machine learning
- Statistics

The project involves collecting and analyzing coke rewards codes under the guidance of Emory and Georgia Tech graduate students to identify potential liabilities behind the generation of such codes.

No prior experience in programming or any of the areas above is required and students from all levels and areas of study are welcomed.
