

Trinoor is looking for a recent college graduate with technical and interpersonal skills to become part of the Trinoor Application Development Team and provide internal and external support to Trinoor Customer projects.

The development team works with a variety of technology stacks, including JavaScript, multiple SOA platforms, Trinoor's cutting edge mobility platform and proprietary Vendor systems.

The successful candidate will have at least some exposure to the use of web-services in modern system architectures and should have experience in programming on one or more of any number of coding platforms: JAVA, Java Script, C, PHP, C#, Ksh, PL/SQL, SQL etc.

Oracle or MS SQL Server database experience is a plus. Knowledge of Linux also a big plus.

The position is an office-based position at Trinoor's world headquarters in Marietta GA. Trinoor is a multinational software and services company, with operations in the US, Canada, Europe, and Australia. Despite its growing size, Trinoor remains a family-oriented company – and - if you are the successful candidate, you will be working on the absolute cutting edge of technology and dealing with large, global utilities and Fortune 50 Customers.

TASheli 

The text "TASheli" is displayed in a large, grey, sans-serif font. To the right of the text is a stylized graphic of a DNA double helix. The helix is composed of two grey strands forming a spiral, with a thick red ribbon-like structure winding between them.
