

The 2022 KDD Undergraduate Consortium

The Undergraduate Consortium at KDD 2022 (KDD-UC) is a new initiative that endeavors to expand and enhance the participation of undergraduate students of diverse backgrounds in research pertaining to knowledge discovery from data.

The KDD-UC will provide

- **critical feedback to undergraduate students on their ongoing research projects with presentation and mentoring session**
- **financial assistance to attend and present their work at KDD 2022 for a selected subset of students.**

The KDD-UC will also organize a panel focused on rewards and potential challenges of different research career pathways, including graduate school/PhD, research labs, and industry. Only undergraduate students may submit papers to the program (they should be the primary authors of the work). Students exploring a career in data science research and also underrepresented minorities are encouraged to apply.

Field of research: Computer Science

Co-Chairs: Dr. David C. Anastasiu (Santa Clara University) and Dr. Esra Akbas (Oklahoma State University)
